PROFESSIONAL SUMMARY

Mechanical Engineer specialized in HVAC, Fire Fighting, and Plumbing systems, with hands-on experience through graduation projects and industrial training. Strong skills in MEP systems design, site supervision, and installation support, with proficiency in Revit MEP and engineering design software.
Experienced in mechanical design and 3D modeling using SolidWorks.
Proficient in CFD simulations and engineering analysis using ANSYS.

EDUCATION

Faculty of Engineering, Kafrelsheikh University, Egypt
Bachelor of Mechanical Engineering – Power Mechanical Engineering (Credit Hours System)
Cumulative GPA: 3.1

PROFESSIONAL EXPERIENCE

Kafrelsheikh University Emergency Hospital – April 2025
Gained practical experience in installing HVAC, firefighting, plumbing, and water supply systems.
Assisted in resolving on-site issues while following safety standards and engineering practices.
Improved understanding of real-site installation procedures and coordination of MEP systems.

West Delta Electricity Production Company (Damanhour Power Plant) August 2024
Studied power generation systems and gained an understanding of turbines and boilers used for steam production.
Examined the condenser cycle leading up to the electricity distribution stages.
Achieved a 90% evaluation grade in the training program.

TRAINING & COURSES

1-Revit MEP (HVAC, Plumbing and Fire Fighting) – EngX Academy – July 2025
Summer Training – EngX Academy
- HVAC Systems
- Fire Fighting Systems
- Plumbing Systems
- Medical Gases

2-Completed a training program with Innovatix platform in CFD & FEA.
3-Completed a comprehensive CFD course explaining governing equations and reference materials, with more than 5 fully implemented projects.

PROJECTS

Menoufia Private Hospital
• Designed HVAC, firefighting, plumbing, and medical gas systems.
• Used AutoCAD, Revit MEP, HAP, and hydraulic calculations.

Smart Office Project
• Developed HVAC, plumbing, and fire protection systems.
• Coordinated designs with BMS and architectural requirements.

Laboratory Building – Libya
• Designed VRF HVAC, AHU, ventilation, and ductwork systems.
• Designed HVAC pipework and performed load & ventilation calculations.
• Prepared HVAC drawings and details using Revit MEP.
CFD Simulation of Vertical Axis Wind Turbines (VAWT) **MARCH 2026**
Executed advanced Computational Fluid Dynamics (CFD) simulations for a VAWT utilizing NACA 0018Heat
Exchanger Design & CFD Simulation Project

TECHNICAL SKILLS

-Revit
-AutoCAD
-HAP
-Duct Sizing
-Elite Fire
-Ansys
-Solid Works
-Microsoft Office

Certificates

- **SolidWorks** Professional and Associate (CSWP & CSWA), along with other certifications.
-Holder of certified courses from Ansys Learning, including:
Ansys Fluent Meshing Watertight Geometry Workflow
-Geometry Representation
-Heat Transfer in Fluids
-Heat Transfer Modeling in Ansys Fluent
-Real External Flows
INNOVATEX Ansys & Simulation Diploma (CFD & FEA) –(Issued Mar 2026)
ENGX Mechanical Systems Design (HVAC, Firefighting, & Plumbing) using Revit (Issued Mar 2026)
